Program Summary

This three-part program focuses on the role of primary care physicians in the management of their patients with diabetes.

Target Audience

This program is designed for Primary Care Physicians.

Part I – May 3, 2005

Examine Barriers to Therapy and A1c Goal Attainment

Learning Objectives

- Review a survey of PCP attitudes and practice management behaviors
- Identify barriers to effective diabetes management and discuss impact on outcomes
- Evaluate treatment options to manage disease progression with prescribing and managing insulin therapy
- Case study review and discussion

Part II – June 14, 2005

Resources and Tools for Your Practice

Learning Objectives

- Review Guidelines & Algorithms for diabetes treatment from nationally recognized organizations
- Discuss the legal implications of the Florida Diabetes Medical Practice Guidelines
- Develop a tool box of resources e.g., flow sheets, DSMT resources, sharing of best practices
- Case study review and discussion

Part III – July 19, 2005

Compliance & Depression in DM Management

Learning Objectives

- Compare and contrast compliance and empowerment approaches in patient management
- Discuss the impact concurrent depression has on diabetes management outcomes
- Case study review and discussion

Accreditation

Physicians and Nurses
